1. Introduction

We welcome interested person involved in Chemical, Biological, Radiological, Nuclear and Explosives (CBRNE) and Disaster Risk Resilience (DRR) to our joint NO-FEAR and STAIR4SECURITY conference in Rome this November 23rd!

NO-FEAR (<http://no-fearproject.eu/>) brings together a pan-European network of emergency medical care practitioners, suppliers, first responders, decision and policy makers to collaborate and exchange knowledge, good practices and lessons learned and also includes practitioners directly involved in CBRNE and DRR.

STAIR4SECURITY (<http://cen-stair4security.eu/>) create a collaborative platform as a single entry point of information on the CBRNE and DRR sectors primarily coming from research activities allowing a better governance of standardization needs to be realised.

Emergency Number:

In Rome, the European Emergency Number is active. For any kind of emergencies you can dial 112.

1.2 Conference suitability

The Joint Conference is of particular interest to professionals directly involved in a Chemical, Biological, Radiological, Nuclear and Explosives (CBRNE) and Disaster Risk Resilience (DRR) incident. It would also be of interest to people involved in European and national security research - policy makers, innovators, research /development expert, as well as standardization, ethical and data protection professionals.

These projects have received funding from the European Union's Horizon2020 programme

NO-FEAR: Grant Agreement Number 786670

STAIR4SECURITY: Grant Agreement Number 853853

1.2 Joint Conference Aims

The joint conference is designed to be highly engaging. It aims to strengthen the ongoing work of NO-FEAR and its collaboration efforts. In this vein, NO-FEAR is pleased to engage with the STAIR4SECURITY project. The conference encourages bi-directional discussions and uses the vehicle of presentations, demonstrations and workshops to interact with attendees. Areas of interest are centered on the new CBRNE/DRR policy making and practitioner driven STAIR4SECURITY platform and how existing related Horizon 2020 operational security projects can interact with this platform. The Joint NO-FEAR/STAIR4SECURITY Conference also involves interaction sessions on where standardization can contribute to strengthen European resilience in emergency medical services under extreme circumstances. Significantly, the conferences also introduce the newly revised CEN Workshop Agreement and Fast-track procedure where best practices can be brought to life at European level. As a practitioner, we would welcome your feedback. Would the proposed revised CWA work for you?

The STAIR4SECURITY project will be very relevant to future proposal calls in Horizon Europe and best practices.
